Structured Soft Skills (not only) for Technical Leaders

Typical career path in IT

Soft skills

Personallity traits

optimism, common sense, responsibility, sense of humour, integrity

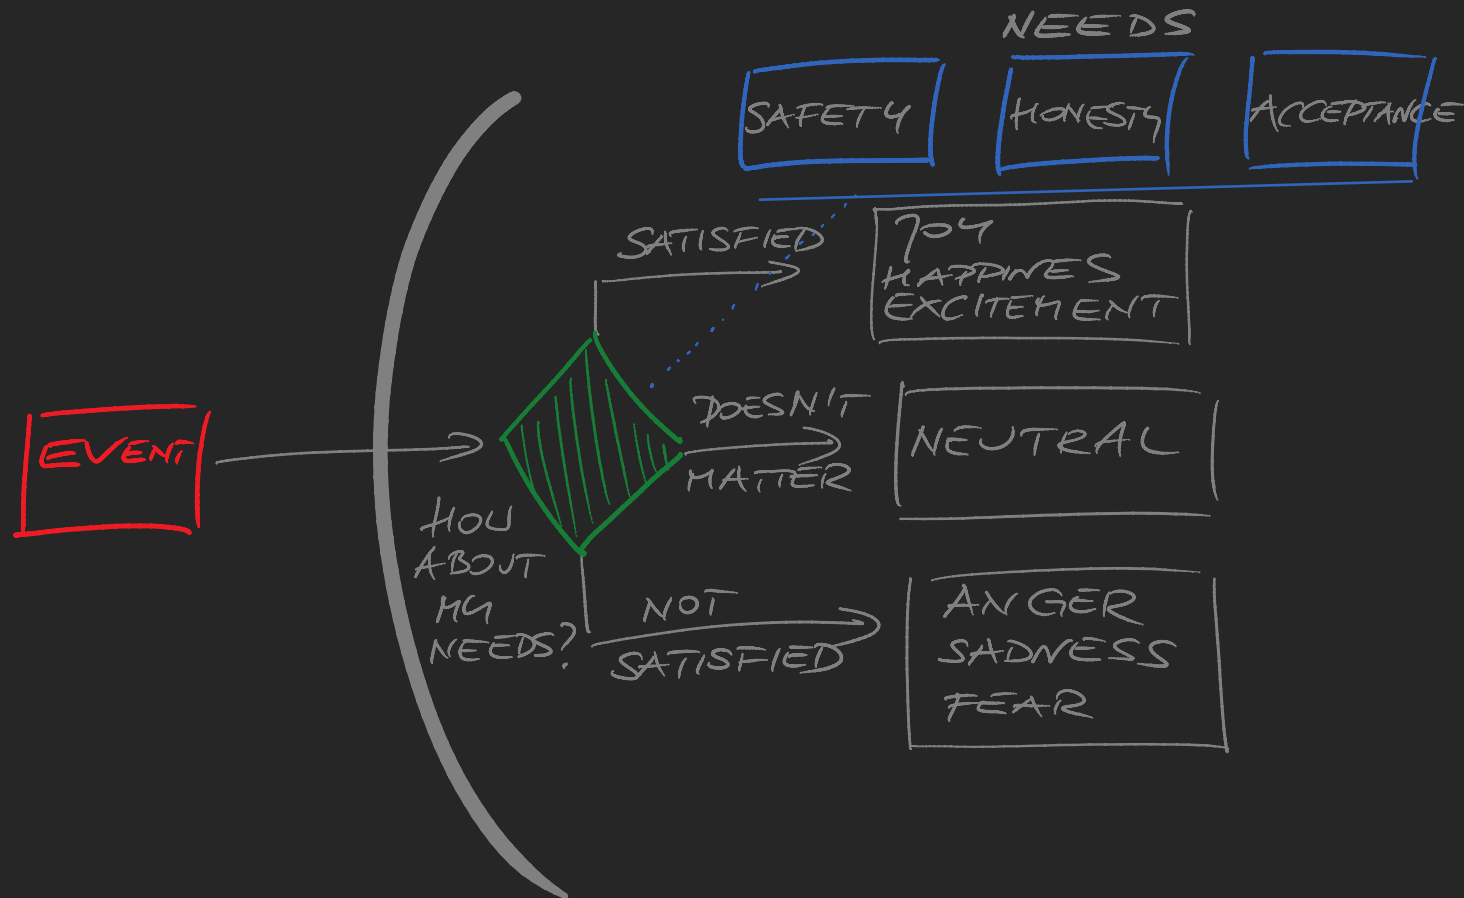

And abilities

empathy, teamwork, leadership, communication, negitation, sociability, ability to teach

... a lot of emotional stuff

Experiment

Structure of emotions

**Using soft skills structures
is like using stair railing.**

**It might be dangerous to
live without it.**

Conflict resolving

If you try to convince each other

You will mostly argue

Usually only one side wins (if any)

At best you may compromise

**You can't resolve
conflicts on a level
they arose**

Conflict resolving Hello World

OK!

Him

Her

OK!

Bright violet

No, I don't like pink as much as white

AND

Maybe another bright color

I don't want to live in hospital (NOT WHITE)

Pink

I want a very bright color

AND

Why is it important?

Why is it important?

I want a blue color

Grrrr... I want white!

Her

Him

Possible Solution
(BRIGHT VIOLET)

Need/Intent
(NOT WHITE, NOT PINK)

*Still conflict! NOT PINK!
AND Let's redefine the need!*

Need/Intent
BRIGHT COLOR

Need/Intent
(NOT WHITE)

Possible Solution
(PINK)

Need/Intent
BRIGHT COLOR

Why is it important?

Statement
(I want a blue color)

AND

Why is it important?

Statement
(I want a white color)

Conflict resolving basic structure

New conflict?
Try again...

Main questions you may ask to level up the discussion

Why is it important?

What do you need in this situation?

What is your intent?

Another samples

Dev

PM

Be able to talk about
**choosing better
technical solutions**

Why is it important?

Easier to talk about
requirements and their
consequences

Why is it important?

**You don't have a
technical knowledge**

**Devs do minimal
technical knowledge
training for PMs**

AND

Project success

Why is it important?

**Time for supporting
project success**

Why is it important?

We are not paid for this

Dev

PM

- Partially participating in meeting
- Be ready for consulting
- Let's analyze last cases

I want to **spend time effectively**

Why is it important?

I don't want to be invited unnecessarily to meetings

AND

We can **make better decisions**

Why is it important?

Your knowledge might be crucial

Problem solving

How do we
usually try
make things
done?

Ask questions

This breaks a pattern of casual thinking

There are some questions specially powerful

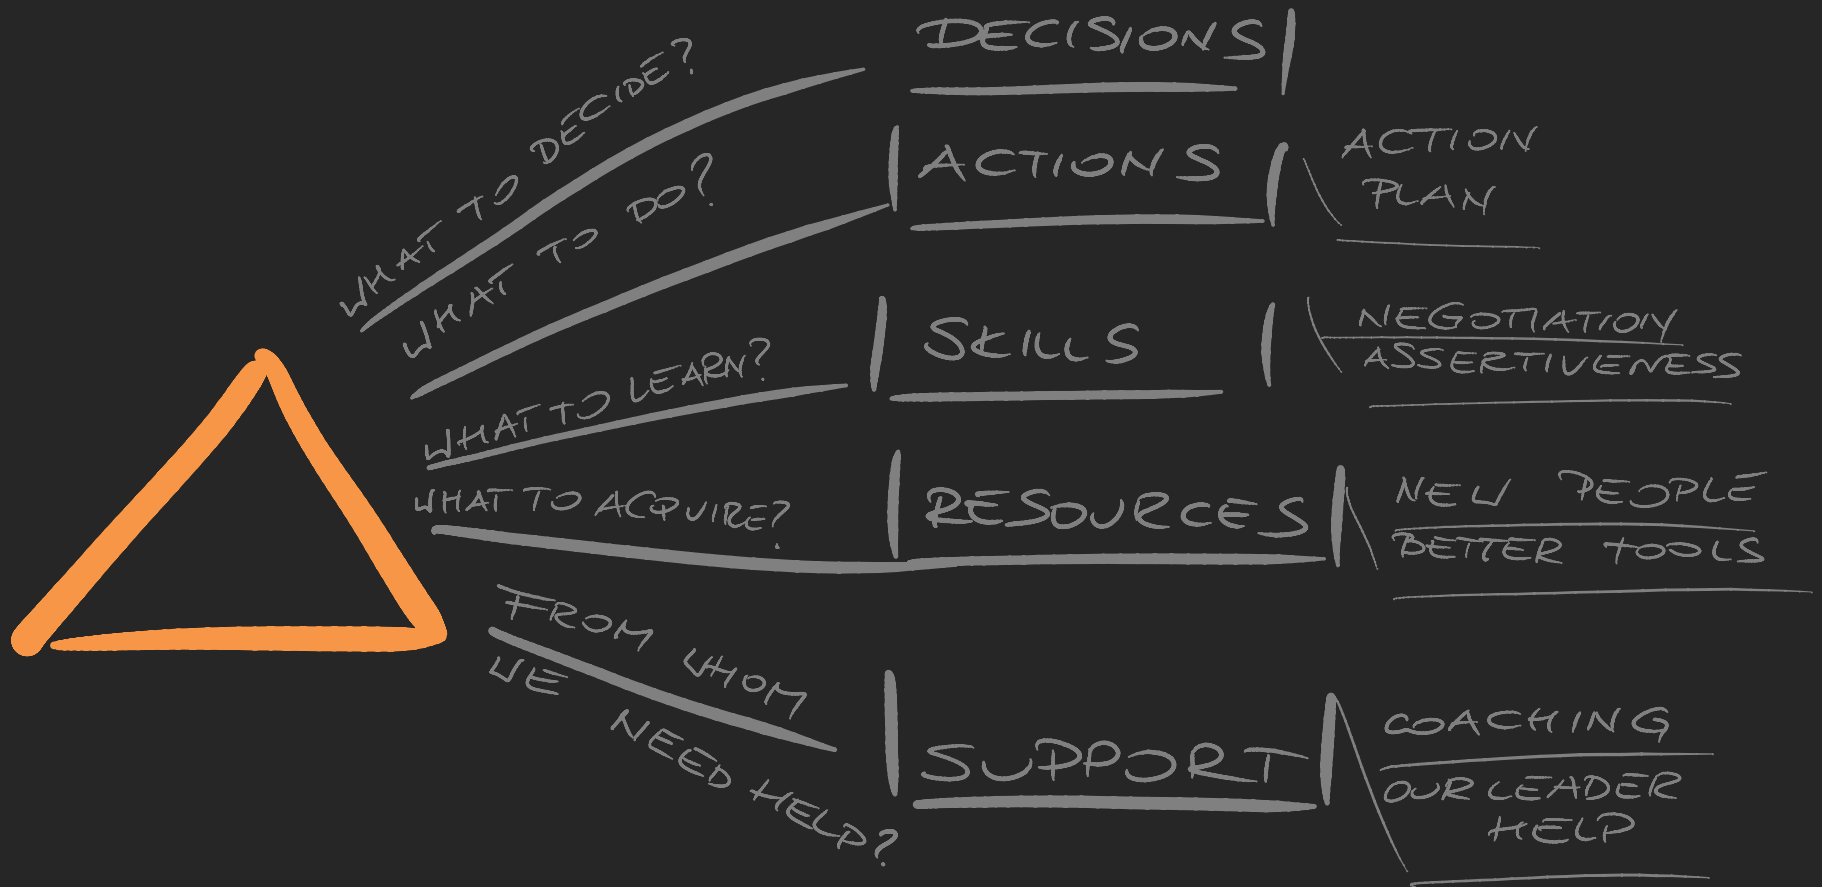

You are likely to know one of this question if
you are using

...5WHYS

But questions are not enough

Delta – how to get there

Structuring meetings

How does it
usually look
like?

Core anitpatterns

People not prepared

The hidden bottom

Drifting away

People not listening to each other

Lack of meaningful results

Lack of action plan

Lack of structure

Meeting agenda

1. Introduction
2. Issues:
 - Too much documentation
 - More time for refactoring
 - PMs to have more understanding of technical aspects
3. Action plan
4. Summary

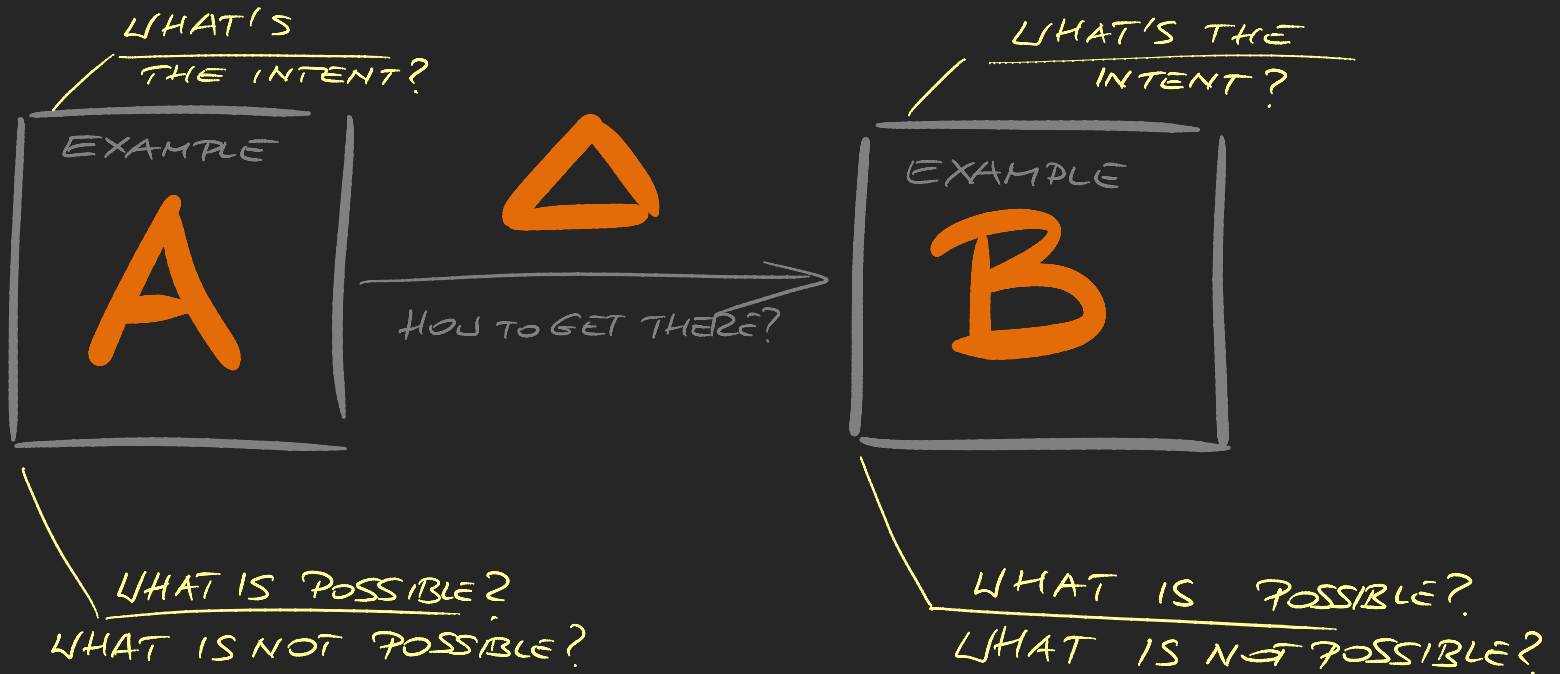

These are implicit conflicts!

Agenda is usually a weak structure!

Let's use conflict resolution structure

Or let's use problem solving structure

Introduce the structure

Conflict resolution

Problem solving

Facing the change

Creating a plan

Retrospective

Set or remind the rules

| AGREE
| ON
| MEETING'S
| RULES
|

„Only one person is talking“

(especially when there are strong emotions, when you talk you don't listen)

„One side talks and then another“

„A facilitator decides who talks next“

Frame potential problems

„It might be difficult to talk about problems and this is why we suppose a positive intention...”

„This form of meeting might seem strange for you but ...”

Frame potential problems

„You might want to talk about issues that are not in the agenda but ...”

„We might come across an impasse while looking for a solution **but this is usually the moment right before the success ...**”

#}
bns it}

①

SHOW
AGENDA

MAIN
GOAL

②

SUGGEST
MEETING
STRUCTURE
AND
EXPLAIN IT

#}
bns it}

③

AGREE
ON
MEETING'S
RULES

④

FRAME
THE
PROBLEMS

5

USE THE
STRUCTURE
AND
FOLLOW
THE RULES

Summary

Using soft skills structures is like using stair railing.
It might be dangerous to live without it.

You can't resolve conflicts on a level they arose.

Instead of giving advices or forcing someone to do something, start asking questions.

Meeting agenda is not enough. Use deeper structure to make it effective.
